Winter Wheat production in Wisconsin is forecast at 16.6 million bushels, up 1 percent from the June forecast and up 2 percent from 2014, according to the latest USDA, National Agricultural Statistics Service – *Crop Production* report. Based on conditions as of July 1, farmers expect winter wheat to yield 72 bushels per acre, up 1 bushel from June's forecast and up 7 bushels from last year. If realized, this will mark Wisconsin's third highest winter wheat yield on record. The area expected to be harvested for grain totals 230,000 acres, down 8 percent from last year.

Oat production is forecast at 14.1 million bushels, up 62 percent from 2014. The expected yield is 67 bushels per acre, up 5 bushels from the previous year. If realized, this will mark Wisconsin's second highest oat yield since records began. The area expected to be harvested for grain totals 210,000 acres, up 50 percent from 2014.

Fall Potato planted acreage by type of potato consists of 55 percent Russets, 34 percent Whites, 8 percent Reds, and 3 percent Yellows.

The forecast in this report is based on July 1 conditions and does not reflect weather effects since that time. The next crop production forecast, based on conditions as of August 1, will be released on August 12.

Area Harvested, Yield, and Production Summary – Wisconsin and United States: 2014 and Forecasted July 1, 2015

United States Summary

Winter wheat production is forecast at 1.46 billion bushels, down 3 percent from the June 1 forecast but up 6 percent from 2014. Based on July 1 conditions, the United States yield is forecast at 43.7 bushels per acre, down 0.8 bushel from last month but up 1.1 bushels from last year. The area expected to be harvested for grain or seed totals 33.3 million acres, unchanged from the Acreage report released on June 30, 2015 but up 3 percent from last year.

Hard Red Winter production, at 866 million bushels, is down 2 percent from last month. Soft Red Winter, at 393 million bushels, is down 5 percent from the June forecast. White Winter, at 196 million bushels, is down 4 percent from last month. Of the White Winter production, 12.7 million bushels are Hard White and 183 million bushels are Soft White.

Durum wheat production is forecast at 75.5 million bushels, up 42 percent from 2014. The United States yield is forecast at 39.6 bushels per acre, down 0.1 bushel from last year. Expected area to be harvested for grain totals 1.91 million acres, unchanged from the Acreage report released on June 30, 2015 but up 43 percent from last year.

Other spring wheat production is forecast at 617 million bushels, up 4 percent from last year. Area harvested for grain is expected to total 13.2 million acres, unchanged from the Acreage report released on June 30, 2015 but up 4 percent from last year. The United States yield is forecast at 46.7 bushels per acre, equal to the 2014 yield. Of the total production, 573 million bushels are Hard Red Spring wheat, up 3 percent from last year.
